## Congratulations, Iuliia!

## EMBO Short Term Fellowship for research stay in Geneva

March 16, 2017

ILRS doctoral researcher Iuliia Viediernikova has successfully applied for an EMBO Short Term Fellowship. <u>EMBO</u> supports young researchers in the life sciences. Iuliia will use this fellowship to visit the Lab of <u>Thierry Soldati</u> in Geneva, Switzerland, for 2 months this summer. This collaboration will allow her to study the defence mechanisms of the soil amoeba *Dictyostelium discoideum* against fungal spores.

Have a fruitful stay in Switzerland, Iuliia!
