

Host-bacteria interaction: studies in cell culture

This workshop will focus on studies to understand the interaction of *S. aureus* and *E. coli* with endothelial cells. During this course, the participants can perform by themselves the *in vitro* cell infection model for gram positive and gram negative bacteria. Theoretical explanation about optimal conditions of infected bacteria and cells as well as topics related with the bacterial phenotype will be discussed. The two-days course will take place at the Institute of Medical Microbiology, UKJ.

Date and Time

December 4, 2018 - December 5, 2018

Location

Location: Institute of Medical Microbiology, Jena University Hospital

Leader

[Lorena Tuscherr de Hauschopp](#)
