

Lunch workshop Manual and automated nucleic acid extraction

Analytik Jena will also stop by at the Leibniz-HKI Jena with the free seminar tour (workshop) on nucleic acid extraction. We present solutions that optimally meet the needs for automated and manual nucleic acid extraction.

In application-related **hands-on workshops**, we show you how to quickly and efficiently purify DNA and/or RNA from a variety of starting materials for small, medium, and high sample throughput.

In addition to the equipment (devices) presentations by Analytik Jena, you can also expect an inspiring exchange of experience and exciting discussions with our experts.

After the event, you will receive a certificate of attendance.

Register directly free of charge, at seminar@analytik-jena.de.

Date and Time

February 11, 2020 // 10:00 - 12:00

Location

Location: Seminar room Louis Pasteur
