Projects

Current Projects

Role of Amoebal Natural Products in Intra- and Interspecies Interactions

[Details](#)

The Effect of Bacterial Natural Products on Multicellular Development

[Details](#)

Natural products from ancient sources

[Details](#)

Former Projects

The roles of secondary metabolites in *Dictyostelium discoideum* – bacteria interactions

[Details](#)

Bioprocess development for cyclic lipopeptide production

[Details](#)

Ecological Role of Natural Products in Microbial Predator-Prey Interactions

[Details](#)
