Projects

Former Projects

The role of virulence determinants of the human pathogenic fungus *Aspergillus fumigatus* in the defense against fungivorous amoeba

[Details](#)

Oxidative inactivation of primary metabolism pathways in the human pathogenic fungus *Aspergillus fumigatus*

[Details](#)

Engineering of polyketide production routes in the amoeba *Dictyostelium discoideum*

[Details](#)

Molekularbiologische Untersuchungen zur funktionellen Genomanalyse des humanpathogenen Pilzes *Aspergillus fumigatus*

[Details](#)
