

Dr. Gianni Panagiotou

Projects

Current Projects

Microbiome systems biology approaches to discover molecular mechanisms in human diseases

[Details](#)

N.N.5

[Details](#)

N.N.6

[Details](#)

Analysis and integration of multi-omics: From data to biology

[Details](#)

The Gut Microbiome in NAFLD: Advancing Diagnosis, Understanding Pathogenesis, and Developing Novel Therapies

[Details](#)

Integrative analysis of microbiome and clinical data in human diseases

[Details](#)

Former Projects

Systems level analysis to elucidate the interplay of host-microbiome in critical illness

[Details](#)

Linking diseases with the human gut microbiome - Biomarker discovery in multi meta-omics data

[Details](#)

From Data to Science: A multi-Omics Analysis of the Pathobiome

[Details](#)
